

WORLD'S FIRST!

POWERFUL NEW LEGAL TESTOSTERONE COMPLEX UNCOVERED!

How you can force your body into a freaky muscle building state by getting on the world's first and only supplement with complexes that jack up testosterone and drive it directly into muscle cells!

Of all the anabolic compounds known to science, one undisputed superior musclebuilder is testosterone. Studied by the medical community for decades, testosterone is the single hormone that separates the men from the boys, the champions from the also-rans. It is the key driver behind every world record, impossible feat of strength or Mr. Olympia physique ever witnessed. Increased levels of testosterone lead to an environment extremely conducive to muscle growth. This is why so many supplement companies attempt to produce formulas that claim to increase testosterone and make over-the-top claims about the results their products can deliver. And even if these products did deliver on these outlandish claims, that wouldn't address the undesirable

side effects associated with elevating testosterone. In other words, you might get much more than you bargained for if you put your trust in these products. A real testosterone supplement is only worth its weight in gold if it can elevate testosterone to maximum human physiological levels and drive it directly into muscle cells *without* causing a corresponding increase in the unwanted metabolite, DHT. Finally, after rigorous third-party clinical testing and scientific investigation, the renowned researchers from Team MuscleTech™ have harnessed a breakthrough like no other. This innovation exploits the incredibly anabolic effects of testosterone without any rise in DHT. They have made what was previously thought impossible, a reality. This revolutionary formula is called CryoTest™.

CRYOTEST™

**WORLD'S MOST hardcore
ANABOLIC TESTOSTERONE AMPLIFIER**

- Increases Testosterone to Maximum Physiological Levels ^{▲,†}
- Drives Anabolically Active Testosterone Directly into Muscle Cells ^{▲,††}
- Lowers Unwanted DHT ^{▲,°}
- Also with Anabolic/Non-Androgenic Key Compound [▲]

WORLD'S FIRST!
Boosts **AND DRIVES**
Test Directly Into
Muscle Cells! ^{▲▲}

168 Capsules
DIETARY SUPPLEMENT

“WITH CRYOTEST
I PLAN ON WINNING
THE 2009 OLYMPIA!”

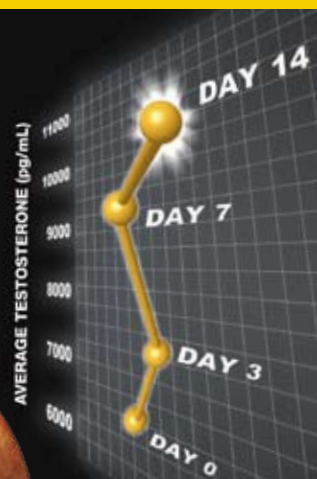

DEXTER JACKSON,
3-TIME ARNOLD CLASSIC CHAMPION

TEST SUBJECTS DRAMATICALLY INCREASED TESTOSTERONE!

**JACK UP
TESTOSTERONE
LEVELS TO OVER
10,000 PG/ML!**

In a two-week study on a key complex found in CryoTest™, researchers showed that the average level of serum total testosterone increased significantly.

TOP SECRET PROJECT

Team MuscleTech™ researchers went to great lengths engineering the CryoTest™ formula. In fact, the project was such a closely guarded secret that it was given a code name so that no one but a select few involved would have

INCREASE TESTOSTERONE TO MAXIMUM PHYSIOLOGICAL LEVELS

In order to validate the potency of the CryoTest formula, each complex in CryoTest is scientifically backed. During preliminary development of the CryoTest formula,

CRYOTEST BOOSTS AND DRIVES TESTOSTERONE DIRECTLY INTO MUSCLE CELLS!

access to the prototype formulas. On top of this, as Team MuscleTech researchers worked relentlessly developing the CryoTest formula, the building was protected by round-the-clock security. Now, with its release, CryoTest has become the world's first and only testosterone-amplifying supplement that contains key ingredients engineered to boost and drive anabolically active testosterone directly into muscle cells!

Team MuscleTech researchers achieved a major breakthrough when they created a formula with a new, unique complex that had never been seen in the bodybuilding world! The power of this complex was observed in a clinical study which showed that test subjects dramatically amplified serum testosterone to maximum physiological levels. Maximum physiological levels represent the highest levels of testosterone within the normal range for men. Anything higher would be supraphysiological.

But even more amazing was the speed of the results! Test subjects in the clinical study actually showed significant increases in serum testosterone levels after just three days. Yes, you read that right – three days! Why waste your money on a product that only claims to boost testosterone when you can have a supplement that actually drives it directly into muscle cells where it can exert its powerful effects?

CRYOTEST WILL TURN YOU INTO AN ABSOLUTE FREAK!

Once again, Team MuscleTech™ researchers have developed one of the most powerful musclebuilding formulas this generation of bodybuilders has ever experienced. And, once word gets out about CryoTest, it won't go unnoticed. There's no doubt that thousands of bodybuilders all over America will

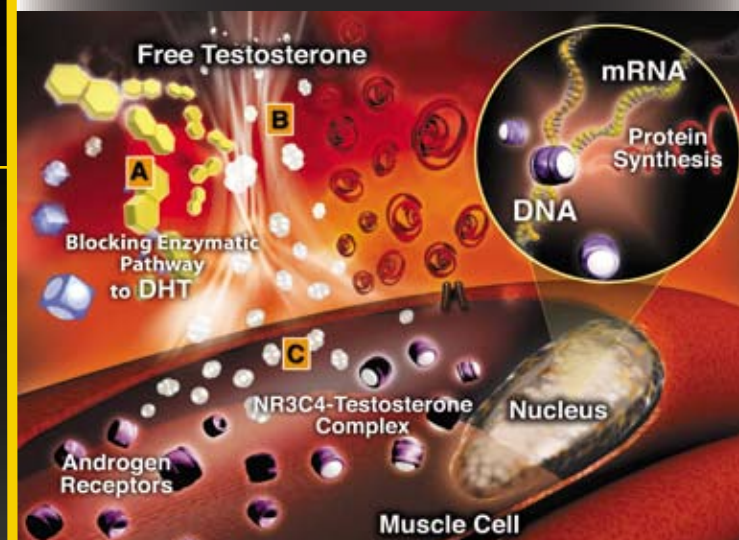

CRYOTEST'S KEY INGREDIENTS ELEVATE TESTOSTERONE TO MAXIMUM PHYSIOLOGICAL LEVELS WITH ZERO INCREASE IN DHT!

That's why CryoTest™ is scientifically infused with a unique ingredient that's engineered and proven to drive anabolically active free testosterone directly into muscle cells! In a published human clinical study, subjects were given one of the key ingredients in CryoTest. After only 21 days, the test subjects experienced a dramatic increase in the number of pre-exercise androgen receptors. And as you know by now, increasing androgen receptors provides a gateway for amplified testosterone uptake, which forces an environment that's extremely conducive to freaky muscle growth!

finally realize the unmatched musclebuilding properties of testosterone without suffering any increase in unwanted DHT levels for the first time ever! This groundbreaking innovation is available at GNC stores across America as of November 1st. Don't waste another second. Kick your musclebuilding gains into sixth gear and get on CryoTest today!

CRYOTEST IS AVAILABLE AT GNC NOVEMBER 1ST!

TESTOSTERONE INCREASE INITIATED BY CRYOTEST™

A One key complex in CryoTest™ quickly goes to work fighting testosterone conversion to DHT.[▲]

B Testosterone is now more abundant and ready to bind to receptors within muscle cells.[▲]

C CryoTest™ is the world's first-ever testosterone-boosting formula that actually contains a key compound that drives anabolically active testosterone right into muscle cells via an intramuscular increase in androgen receptor concentration.[▲]
